Education

University of Missouri **Columbia, Missouri**

B.S, Information Technology Engineering *2015-December 2019*

Relevant Coursework: Algorithm Design, Database Systems, Full Stack Web Development, Object Oriented Programming, Software Engineering, Networking, Information Security

Professional Experience

Oberd, Inc.

Project Support Specialist *May 2019 – Current*

- Worked indirectly with clients to satisfy expectations in building and formatting digital health forms
- Utilized **HTML5/CSS/JavaScript/JQuery** to customize client forms
- Determined user-friendly and effective layouts of questions and form information
- Assisted team with data management, entry and deletion

Projects

E-Commerce Application

2019

- Currently building a professional, scalable E-commerce application using **React**
- Will use **Firebase** for user authentication
- Will use **Redux, GraphQL**, and more!
- This is my repo (I haven't hosted this application yet):**https://github.com/griffinstiens/E-CommerceApp**

AWS Cloud Infrastructure | System Administration

University of Missouri - 2019

- Configured, deployed and maintained 4 instances (**RedHat Linux (2)**, **WordPress**, **Windows Server 2018**) within a **Virtual Private Cloud**.
- Managed user accounts with designated passwords and private/public keys for authentication
- Utilized **MySQL** in creating and maintaining a database
- Configured **FTP** server to allow for file uploads

Software Engineering

University of Missouri - 2019

- Collaborated with 3 other programmers to develop an alternative system for instructors to manage students and coursework
- Designed a website for the application using **HTML** and **Materialize CSS**
- Utilized **MySQL** with **PHP** to allow for insertion of data and display
